*4 hours of boating are typical at various speeds with suggested Battery Amp Hours (Ah). Range may vary based on variables such as boat size, fully loaded weight and throttle management. Our motor lineup powers various applications with runtimes up to 8 hours. To extend range increase Ah or add second bank. Elco's technology is battery agnostic, so you can match outboard voltage with any type of battery. You can use your existing batteries, source locally, or leverage the Elco Dealer Network.
