

The Elco Electric Propulsion System: The Hunter 27e

27 ELECTRIC

STANDARD EQUIPMENT

10 HP ELCO AC ELECTRIC ENGINE
(6) 12V ZERO MAINTENANCE
AGM BATTERIES (214 AMP HOURS)

ENERGY PACKAGE OPTION

WIND GENERATOR
T-TOP W/SOLAR PANELS (3) AND CANVAS

27e

Elco Motor Yachts is pleased to announce it has teamed up with Hunter Marine Corporation to produce and market the Hunter 27 sail boat with electric propulsion.

The diesel engine has been substituted with the Elco EP-1000, an electric engine that offers the same amount of thrust as the H-27's normal 14hp diesel engine. The electric engine offers the advantages of being truly "green" in that it does not emit any "emissions, noise, vibrations, heat, or fumes" as it operates solely on battery power.
